Billing for Points of Sale. Management of Sales, Stock, Purchasing and Treasury Billing for Points of Sale. Management of Sales, Stock, Purchasing and Treasury.

Features	Gestión	Enterprise	Pro	Lite
Documents				
It allows issuing Ticket, Ticket bills A, B and C, A and B	Х	Х	Х	Х
Invoice, Credit Notes A and B, Debit Notes A and B, and				
other Approved Fiscal Documents				
Emits Tickets, Invoices, Quotes, Orders and Delivery	Χ	X	Χ	Х
Notes on non-fiscal printers Windows and OPOS				
(conditionally available to customers Argentina)				
Allows modification and unlimited definition of fiscal or	Χ	X	Χ	X
internal receipts by the user				
It allows the user to design the format of their receipts	Χ	X	Χ	Х
(Tickets, Packing slips, Receipt, Invoices, etc.).				
Prints concurrently with the capture or differed to close the	Χ	X	Χ	Х
document. You can set the clean ticket mode consolidating				
repetitions of the same product.	V	V	V	V
It allows suspending documents and retrieve them in the	Χ	X	Χ	Х
same outlet or in another one.	Х	V	V	V
Work orders on local or remote printers. Handles an	Χ	X	Χ	Х
unlimited number of Order Printers.	Х	X	X	
Emits a Credit Note Voucher with security code. It allows	λ	_ ^	Χ	
handling returns without issuing credit notes using a				
coupon that is discounted to another purchase. Emits a Credit Card Voucher ON LINE (requires	Х	Х	Х	
CheckOUT ON LINE and X25 connection with the	^	_ ^	^	
authorization centers).				
Emits a Credit Card Voucher OFF LINE (requires	Х	Х	X	
CheckOUT ON LINE and X25 connection with the	Λ		Λ	
authorization centers).				
Emits receipts for billed packages	Χ	Х	Х	Х
Emits receipts for container returns	X	X	X	X
Stampings Checks	X	X	X	X
Emits receipts of Current Account	X	X	X	X
Emits Points Summary of the frequent customer program	X	X		
Emits home delivery ticket	Х	X	Х	
Emits Awards Receipt	Х	X	X	
Charges Services to Third Party account and stampings	Χ	Х		
receipts				
Accepts payments on current account customers and	Х	Х		
issues payment receipts				
Issues Pro form on non-fiscal printers	Χ	Χ	Χ	Χ
Gastronomy				
Simultaneous Interface with TouchScreen, Mouse or	Χ	Х	Χ	Χ
Keyboard. Allows the use of touch screens, Mouse, normal				
or programmable keyboards				
Dynamic configuration of touchscreen-based product groups	Χ	Х		
Handles table service of open tables with deferred printing.	Χ	Х	Χ	Х

Itiap). Iti can handle six planes of tables simultaneously (floors, sectors, levels) Divides a table up to ten sub-tables Allows dividing a pending bill up to ten subbills selecting the elements that will be billed separately and issuing different receipts to each (ticket, bill, ticket invoice A, etc) Divides the tables on an unlimited number of sectors (Restaurant, Bar, Delivery, etc.) with different price lists Allows assigning fixed waiters per table, select it when table servicing or a combination of both Allows assigning fixed waiters per table, select it when table servicing or a combination of both Allows assigning fixed waiters per table, select it when table servicing or a combination of both Allows assigning fixed waiters per table, select it when table servicing or a combination of both Allows assigning fixed waiters per table, select it when table servicing or a combination of both Allows assigning fixed waiters per table, select it when table servicing or a combination of both Allows assigning fixed waiters per table, select it when table servicing or a combination of both Allows entering the actual billed amount of guests by each table in real time Manages at user selection the control of charging and cleaning tables. Allows entering the actual billed amount of guests by each table in real time Manages at user selection the control of charging and tables fixed price menus composed by multiple possible terms (set menu, half menu, executive menu, free fork). The system collects the amount of the fixed menu and then allowed to enter the component products by billing without charging so that the cashier checks the kitchen products. Allows creating a database of recipes and relate the composition formulas of products, including the development of the preparation of the dishes and pictures of the process Historical Query of tables serviced with the information of opening, closing, waiters, products, documents and payment Allows assigning to the products sectors where the orders datal	Allows to visually locate each table using a digital floor				
Sectors, levels) Divides a table up to ten sub-tables Allows dividing a pending bill up to ten subbills selecting the elements that will be billed separately and issuing different receipts to each (ticket, bill, ticket invoice A, etc) Divides the tables on an unlimited number of sectors (Restaurant, Bar, Delivery, etc.) with different price lists Allows assigning fixed waiters per table, select it when table servicing or a combination of both Allows assigning fixed waiters per table, select it when table servicing or a combination of both Allows setting at Waiter-level who keeps track of the money (wallet) allowing to combine some waiters who tally up at the end of the shift with others that charged with the cashier It has a monitoring interface that displays the status of a cach table in real time Manages at user selection the control of charging and cleaning tables. Allows entering the actual billed amount of guests by each table operation Handles fixed price menus composed by multiple possible items (set menu, half menu, executive menu, fire fork). Discount by percentage per item with optional authorization	X	X	X	X
Billing by Total Price (the system calculates the amount	Х	X	X	Х
based on the price)	.,			.,
Cancellation of any item issued with authorization	X	X	X	X
Review of the strip on screen	Х	X	Х	Х
Issuance and discount voucher pack	Х	Х	X	Х
Hotkeys assigned to products or departments configurable	Χ	X	X	
by the user				
Allows overlaying key functions according to the time of	Х	Х	X	

billing at the point of sale (for example, a key may be a				
means of payment and as a department according to				
whether you are entering payments or articles)				
Maintenance of the Items File	Х	Х	X	Х
Record of Supplier's pricelist, surcharges and discounts,	Х	Χ	X	Х
net cost price and profit margin to get to the selling price.				
Allows handling margins on cost or sales.				
Configurable update of the sale prices based on the	Х	Χ	X	Х
recorded margin in the product when the cost price is				
changed. The system allows you to select whether the				
sales price is always changing, if it only grows, if it only				
lowers and modifies the margin not affecting the sales price				
or performs no update				
Recovery of products at cost price for an unlimited number	Х	Χ		
of currencies. The system maintains the selling price in				
local currency taking into account variations in the				
exchange rate of the cost value.				
Automatic rounds off sale prices when an automatic cost	Х	Χ		
change update occurs. Allows setting the number of				
decimal places and rounding type (arithmetic, 5 and 9 or				
truncating values)				
Price Lists and offer between two dates per branch	X	X	Х	
Price lists per branch calculated based on a margin over	Х	Χ		
individual cost for each outlet.				
Differentiated cost prices by branch	Χ			
Allows restricting the validity of items to certain days and	Χ	Χ	Х	
hours of the week				
Related Articles to allow recording the sale of several	X	Χ	Х	
products for one price				
Historical Record of the evolution of sales price	X	Χ	Х	
Registration of Physical Location of Goods in the	Χ			
warehouse				
Prices for quantities bands with differential pricing. Also	Χ	Χ		
allows setting the price of the amounts range based on a				
percentage of profit over the cost				
Maintenance of composition formulas of items. It allows an	Χ	Χ	X	
unlimited number of levels of formulas: a product can have				
another product as a component which also has a formula				
Record of stock movements of the components of a	Χ	Χ	X	
formula for the transactions of the finished product.				
Automatic generation of costs based on a composition	Χ	Χ	Х	
formula. The cost of an item is calculated based on the				
price of its components and it is automatically updated				
when any of these change.				
Automatic calculation of weighted average cost	X	Χ		
Automatic recovery of transactions by the weighted	X			
average cost when inventory movement is inserted			<u> </u>	
Summary of sales on costs and sales units with return over	Х	Х	Х	
cost, and sales on day and branch of an item between two				
dates.

Generation of internal orders	X	X		
Centralized supply of internal orders,automatic packing	Х	Х		
slips creation				
Crossdock conversion of an income movement making	X	Χ		
multiple out transfers to other warehouses / branches				
Generation of Purchase Orders based on added orders	Х	X		
Report of Purchase Orders received by branch	Х	Χ		
Report of Purchase Orders added of all branches	Х	Х		
Definition of Groups of Orders	Х	Χ		
Inventory replenishment model based on demand	Х			
prediction.				
Ranking of Purchases by supplier	X	X		
Ranking of Purchases by Product	Х	Χ		
ABC classification of items for sale and purchase analyzing	Х			
transactions				
Analysis of changes in average selling and buying prices	Χ			
with ABC classification				
Automatic accounting entry by reception of purchase orders	X			
Control of Staff Schedule (InTime)				
Allows signing up in the POS via a hot key regardless of	Χ	Χ		
the current operation				
Maintenance of the Staff files Table	Χ	Х		
Shift Maintenance	Χ	Χ		
Definition of templates for weekday shifts per employee.	Χ	Χ		
Handling of multiple shifts per day				
Definition of special hours for sign ups out of turn or	Χ	Χ		
schedule changes				
Integration with Checkout Syncaja for the distributed	Χ	Χ		
administration of the staff schedules. Defined in the Central				

Administration, depending on the authorization level	1		I	
schedule changes are allowed in the branch and then the				
sign up information is concentrated in the central				
administration				
Detailed information for file between two dates with times	Х	Х		
of arrival and departure, novelties (late arrivals, early				
departures, before arrivals, departures after shift,				
absences). It also reports the total minutes worked and				
total number of absences				
List of Sign Ups between two dates with times of arrival	Х	Χ		
and departure, novelties (late arrivals, early departures,				
arrivals before departures after shift absences). It also				
reports the total minutes worked and total number of				
absences				
Optionally allows signing without shift recording the	Х	Х		
schedule entry and exit				
Generates sign up cards with photo and barcode	Х	Χ		
Sale on behalf of third parties				
Addition of consignment agreements related to the	Х	Χ		
suppliers. Registration of comissions, expenses and				
deductions				
Relationship of Products agreements with variable	Χ	Х		
commission percentage at item-level				
Identification of products on consignment in the receipt	X	X		
Clearance sales agreement with details of goods sold,	Х	Χ		
expenses, and commissions				
Financial / Goods Reservation Planes				
Administration of financial plans with configurable	X	Х		
adjustment and amortization methods				
Adittion of plans / goods reservations and issuance of the	X	Х		
receipt with the detailed conditions at the point of sale				
Collection of Financial / Goods Reservations plans, issuing	Х	Х		
receipts at the point of sale				
Tally up of the point of sale of collection by Financing Plan	X	X		
Payment and plans Cancellations at point of sale	X	Х		
Management of Expenses, Early Cancellation Fees and	Х	Х		
Price Adjustments		V		
Historical analysis of transactions per customer	X	X		
Report of pending operations and overdue	X	Х		
Report of Collection per Plan	X	Х		
Account Summary per Customer	Х	Х		
Human resources Maintenance of the employees's personal data table				
List of documentation required and given to each employee	X			
File with the employee's evolution including news, evaluations,	X			
comments and sanctions	^			
Registration of extra remuneration concepts	Х			
Periodic payment of extras (salaries, commissions, prizes, discounts,	X			
loans, purchases, payments)				
Automatic importation of advances and purchases recorded in the	,, 1	1		
outlets	Х			

Pending Checks				
Update of Pending Checks Files	Х	Х	Х	
Automatic addition of values per sales at the point of sale	Χ	Х	Х	
or collection				
Automatic output values for payments to suppliers	Х	Х	Х	
Report of values maturity	Х	Х	Х	
List of Values according to its state	Х	Х	Х	
Tracking of values with its information of origin and	Χ	Х	Х	
destination of each document and automatic record in the				
corresponding treasury account				
Treasury				
Handling of multiple User-definable Treasury accounts	Χ	Х	Х	
(cash, banks, pending checks, etc). Supports an unlimited				
number of sub accounts for each account				
Addition of Treasury transactions by income, discharge or	Χ	Х	Х	
transfer of values				
Update of treasury accounts automatically by sales at the	Χ	Х	Х	
point of sale or purchases	Λ,		^	
Management of deferred transactions (checks to certify,	Χ	Х	Х	
lease payments, etc.)	Λ			
Report of Treasury Movements between two dates	Χ	Х	Х	
Point of sale Spreadsheet	X	X	X	
Report of Movements by Operation Code	X	X	X	
Flow of funds to date or accumulated with projection of	X	X	X	
income and expenses	٨	_ ^	_ ^	
Automatic accounting entries for Treasury movements	X			
Sales Reports	Λ			
Sales by Means of payment between two dates by Branch	Х	Х	Х	Х
and point of sale	٨	_ ^	_ ^	^
Sales by Department with and without VAT between two	Χ	Х	Х	Х
dates by branch and / or supplier, summary or detailed	Λ	^	_ ^	^
cost-benefit analysis				
Hourly Sales	Χ	Х	Х	Х
Sales by Category with profitability analysis	X	X	X	Λ
Sales Summary or Detailed by Document Type and divide	X	X	X	Х
by means of payment between two dates, branch and	٨	_ ^	_ ^	^
operator				
Sales by Customer Fiscal Condition between two dates,	Х	Х	Х	Х
detailed or summary, by branch, document and operator	Λ	_ ^	_ ^	^
Sales by branch spreadsheet shaped with the sales and	Х	Х	Х	
amount of summarized operations per day with a column	Λ	^	_ ^	
for each branch				
Sales by summarized and detailed Operator between two	X	Х	X	Х
dates, branch and / or point of sale	Λ	^	_ ^	^
Ranking of Articles Sales	X	Х	X	Х

date, or item included in the detail	Χ	Χ	X	V
Sales Report by Group / Brand	٨	٨	_ ^	X
Audit Reports				
Report with the authorizations made by each supervisor	Χ	Χ	X	Х
grouped by type of transaction between two dates per				
branch				
Audit Report of the operations performed by each operator	Χ	Χ	X	Χ
between two dates, type of operation and point of sale				
Report of Prices entered by operators with the original	Χ	Χ	Х	Х
price and the new one to replace it				
Report of the third-parties accounts collection held at the	Χ	Χ		
point of sale				
Consultation of Users logged in	Χ	Χ		
Consultation of the Fiscal Controller Closing	X	Χ	Х	Χ
User Access Report detailing the date and time of entry	Χ	Χ		
and exit to the system				
Report of Surcharges and Discounts by date, time,	Χ	Χ	Х	
operator, category				
Statistics of the average utilization of the system at the	Χ	Χ		
point of sale (sales, annulments, authorizations,				
tickets per minute, items per minute, etc.)				
VAT Sales Report divided by tax rate between two dates,	Χ	Χ	Х	
branch or consolidated				
VAT Purchases Report	Χ	Χ	Х	
Security and Auditing				
Transactional integrity provided by a database engine	Χ	Χ	Х	Χ
Login operator integrated with Windows 95/98/NT/2000	Χ	Χ	Х	Χ
Login with possibility of independent validation of chip /	Χ	Χ	Х	Х
magnetic / barcode card				
Wide flexibility for setting safety standards and supervisor	Χ	Χ	Х	
authorization for each operation				
Creation of user groups	Χ	Χ		
Security Editor to define the rights of individual or group of	Χ	Χ		
users for each system option				
Security policies for passwords: minimum length, time	Χ	Χ		
validity, sensitivity to upper and lower case, control of				
password reuse				
Historical Log of changes to the data and privileges of	Χ	Χ		
operators				
The supervisor authorization can be validated by a	Χ	Χ	Х	
password, magnetic card, key or chip card				
Uses global date and time based on the main database	Χ	Χ	Х	Х
engine				
Logical grouping of work days in the same sequence	Χ	Χ	Х	Х
number				
Home Log in plaintext configurable per operation and point	Χ	Χ	Х	Χ

of sale				
Home Log based on locally or remotely configurable data	Х	Х	Х	Х
per operation and point of sale				
Generating ribbon witness mirror with a copy of all	Χ	Χ	Х	Χ
recorded information.				
Detailed record of the operating time of each operator per	Χ	Χ	Х	
point of sale or outlet				
Tally up by operator (roving operator) controlling	Χ	Χ	Х	Х
transactions regardless of the point of sale where they				
were made.				
Reliability				
Backup at the point of sale using a Local Database in case	Χ	Χ	X	Х
of a failure of the network or the primary server.				
Automatic Backup from the server to the database	Χ	Χ	Х	Χ
Local resolution OFFLINE of authorizations of credit card	Χ	Χ		
transactions. Automatic retransmission to recover the				
service. (Requires checkout ONLine and connection x25 to				
authorization centers)				
Support of redundant servers in high availability	X	X		
configurations				
Technical Characteristics				
100% Compatible Year 2000	Χ	Х	Х	Х
Supports natively fiscal printers	Χ	Х	X	Х
Supports Windows NT/200/ XP /Unix /Linux /Netware servers	Χ	Χ	Χ	Χ
Client / server architecture three tier	Χ	Χ	Χ	Χ
Operation in Single User mode on a single computer	Χ	Χ	Х	Х
Multi-mode operation on an unlimited number of computers	Χ	X	Х	Х
on a local area network or extended				
Internal System Replication for files, email or direct TCP /	X	X	X	
IP connection (requires syncaja module)				
Native code 32-bit for Windows operating systems	Χ	Χ	Х	Х
95/98/Me/NT/2000/XP/Vista				
Native access to database Servers Sybase ASA or	Χ	Х	Х	Х
Microsoft SQL Server				
The billing program integrates as a Shell from the client	Χ	Х	Х	Х
operating system Windows NT				
It is compatible with the leading manufacturers of POS	Χ	Х	Х	Х
hardware. It is based on the OPOS standard 1.x
